

# Drugs Requiring Prior Authorization for Medical Necessity for CareFirst Formulary 2

(Effective Jan 1, 2025)

Below is a list of additional drugs that require a medical necessity prior authorization before they are covered by your CareFirst BlueCross BlueShield or CareFirst BlueChoice, Inc. (CareFirst) prescription drug plan. You may still be able to get these drugs with an approved prior authorization if the drug is medically necessary. However, without an approved prior authorization from CareFirst, you will be responsible for the full cost of the prescription.

If you are currently using one of the formulary drug removals, ask your doctor to choose one of the generic or brand formulary options listed below.

Category Drug Class	Formulary Options
All Drugs	On a quarterly basis, new and existing products – including limited source generics, products with significant cost inflation, and specialty and non-specialty products – may be re-evaluated to determine appropriate formulary placement. These evaluations will assess whether clinically appropriate and cost-effective options remain available on the formulary and may result in additional products not covered without a medical exception, addition, or deletion of a product.
Atopic Dermatitis*	As new atopic dermatitis products launch, all existing products in the class will be re-evaluated to determine appropriate formulary placement. These evaluations will assess whether clinically appropriate and cost-effective options are available on the formulary and may result in additional products not covered without a medical exception, addition or deletion of a product on the first day of any calendar month.
Autoimmune and Hepatitis C *	An Indication-Based Formulary will be utilized for products in these classes and may result in additional exclusions.
Generics	Limited source generics may be evaluated when appropriate and potentially removed from the formulary.
Hepatitis C	As new products launch in this class, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially excluded, added back to formulary or not listed.
Hyperinflation	On a quarterly basis, products with significant cost inflation that have clinically appropriate and more cost-effective alternatives may be evaluated and potentially removed from the formulary.
New-to-Market Agents <sup>1</sup>	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.
Specialty	As new specialty products launch, all existing products in the class will be re-evaluated to determine appropriate formulary placement and potentially excluded, added back to formulary or not listed.

The listed formulary options are subject to change.

† Listing does not include certain NDCs<sup>^</sup>

<sup>^</sup> Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation, and package size

<sup>1</sup> If your doctor believes you have a specific clinical need for one of these products, he or she should contact the Prior Authorization department at 1-855-240-0536.

<sup>2</sup> For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3)

<sup>3</sup> If approved for coverage and prescribed for primary prevention of cardiovascular disease, may be covered without cost sharing through an exceptions process.

<sup>4</sup> Rebranded or private label formulations are not covered without a prior authorization for medical necessity (i.e. RELION)

<sup>5</sup> BD ULTRAFINE syringes and needles are the only preferred options.

<sup>6</sup> An ACCU-CHEK or ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ONETOUCH. For more information on how to obtain a blood glucose meter, call 1-877-418-4746.

<sup>7</sup> ACCU-CHEK or ONETOUCH brand test strips are the only preferred options.

<sup>8</sup> Listing reflects the authorized generics for TESTIM and VOGELXO.

<sup>9</sup> CVS Caremark is an independent company that provides pharmacy benefit management services.
