

Maintenance Drug List

Effective April 2024

Maintenance drugs are prescriptions commonly used to treat conditions that are considered chronic or long-term. These conditions usually require regular, daily use of medicines. Examples of maintenance drugs are those used to treat high blood pressure, heart disease, asthma and diabetes.

Due to the large number of available medicines, this list is not all inclusive. Please note that this list does not guarantee coverage and is subject to change. Your prescription benefit plan may not cover certain products or categories, regardless of their appearance on this list. Where a generic is available, it is listed by the generic name. If no generic is available, then the brand name appears. This list represents brand products in **CAPITAL LETTERS** and generic products in lower case *italics*.

You may be enrolled in a plan that has one of our Maintenance Choice[®] programs.

- Maintenance Choice All Access: A one-month supply of maintenance medications is covered up to two times at any participating network pharmacy. Afterwards, a three-month supply will only be covered through CVS Caremark[®] Mail Service or at a CVS Pharmacy[®] retail location.
- Voluntary Maintenance Choice: You have the option to fill a three-month supply of a maintenance medication through CVS Caremark Mail Service or at a CVS Pharmacy. You may also fill a one-month supply of these medications at any participating network pharmacy.

The coverage of prescription drugs and supplies along with the utilization management listed on this document is dependent on your benefit plan and is subject to change. For the most accurate information on your drug cost and pricing, please log in to My Account (www.carefirst.com/myaccount) and click on Drug & Pharmacy Resources under the Coverage tab.
