---

## 2024

**PLEASE READ:** This document contains information about the drugs we cover in this plan. This formulary is for members of an employer group with 51 or more employees. For your specific prescription benefit plan information, log into your account at [carefirst.com](https://carefirst.com).

For more recent information or other questions, please contact CareFirst Pharmacy Services at **800-241-3371** or visit [carefirst.com/rxgroup](https://carefirst.com/rxgroup).

# Introduction

A formulary is a list of covered prescription drugs. Our drug list is reviewed and approved by an independent national committee comprised of physicians, pharmacists and other health care professionals, known as the Pharmacy and Therapeutics Committee. This committee makes sure the drugs on the formulary are safe and clinically effective.

Within the formulary, prescription drugs are divided into tiers as described below. Depending on your plan, prescription drugs fall into one of three drug tiers which determines the price you pay.

## Using Your Formulary

The first column of the formulary lists drugs by name. If the drugs are shown in lowercase italics, they are *generic drugs*. If the drugs are bold and capitalized, they are **BRAND-NAME DRUGS**.

You may search the formulary for a drug by pressing "CTRL" and "F" at the same time to prompt a search.

The second column indicates the drug tier for a covered drug.

The third column indicates any prescription guidelines a drug requires such as prior authorization (PA), step therapy (ST) or quantity limits (QL).

- **Prior Authorization** from CareFirst is required before you fill prescriptions for

certain drugs. Your doctor may need to provide some of your medical history or laboratory tests to determine if these medications are appropriate. Without prior authorization from CareFirst, your drugs may not be covered.

- **Step Therapy** requires that you try lower-cost, equally effective drugs that treat the same medical condition before trying a higher-cost alternative. Your doctor will need to provide information to CareFirst about your experience with these alternatives prior to dispensing a more expensive drug.
- **Quantity Limits** have been placed on the use of selected drugs for quality or safety reasons. Limits may be placed on the amount of the drug covered per prescription or for a defined period of time. For example, quantity limits apply to specialty drugs. Specialty drugs are medications that may be used to treat complex and/or rare health conditions and require special handling, administration or monitoring. Specialty drugs are typically covered for a one-month supply.

Members can view specific cost-share (copay or coinsurance) information and prescription guidelines by logging in to *My Account* at [carefirst.com/myaccount](http://carefirst.com/myaccount) and clicking on *Tools* and *Drug Pricing Tool* or by reviewing their annual summary of benefits.

<b>Tier 0: \$0 Drugs</b>	<ul style="list-style-type: none"> <li>■ Preventive drugs (e.g. statins, aspirin, folic acid, fluoride, iron supplements, smoking cessation products and FDA-approved contraceptives for women) are available at a zero-dollar cost share if prescribed under certain medical criteria by your doctor.</li> <li>■ Oral chemotherapy drugs and diabetic supplies (e.g. insulin syringes, pen needles, lancets, test strips, and alcohol swabs) are also available at a zero-dollar cost share.</li> </ul>
<b>Tier 1: Generic Drugs \$</b>	<ul style="list-style-type: none"> <li>■ Generic drugs are the same as brand-name drugs in dosage form, safety, strength, route of administration, quality, performance characteristics and intended use.</li> <li>■ Generic drugs generally cost less than brand-name drugs.</li> </ul>
<b>Tier 2: Preferred Brand Drugs \$\$</b>	<ul style="list-style-type: none"> <li>■ Preferred brand drugs are brand-name drugs that may not be available in generic form, but are chosen for their cost effectiveness compared to alternatives. Your cost-share will be more than generics but less than non-preferred brand drugs. If a generic drug becomes available, the preferred brand drug may be moved to the non-preferred brand category.</li> </ul>
<b>Tier 3: Non-preferred Brand Drugs \$\$\$</b>	<ul style="list-style-type: none"> <li>■ Non-preferred brand drugs often have a generic or preferred brand drug option where your cost-share will be lower.</li> </ul>
